Data Notes:

Demographic data: There will be small count differences in data presented by age groups, self-reported sex, and hospitalization status. This is because some cases are not initially reported with all of these data elements and unknowns are excluded from this report. Case data will be updated as local health departments (LHDs) and the Utah Department of Health (UDOH) complete investigations.
Race & Ethnicity: Race and ethnicity groups follow US Census estimates for race alone or in combination in order to provide a broad snapshot of Utah's growing diversity, including the many multi-racial and multi-ethnic individuals who call Utah home. Groups are not mutually exclusive and will not sum to total.
